As the world's first International Standard dealing with health and safety at work. It is issued to protect employees and visitors from work-related accidents and diseases. ISO 45001 Occupational Health and Safety Management Systems standard replaces OHSAS 18001 - the former benchmark and is a migration.

Occupational Health & Safety

→ **It's a milestone!**

WHY 45001 REPLACES 18001?

ISO 45001

- ISO 45001 is process based
- Dynamic in all clauses
- Considers both risk and opportunities
- Includes the view of interested parties

OHSAS 18001

- OHSAS 18001 is procedure based
- Is not dynamic in all clauses
- Deals exclusively with risk
- Does not include the view of interested parties.
