

STANDARD GLOBAL QUALITY CERTIFICATES

TRAINING:

SGQC's training programs cover a broad range of safety material to provide a general safety orientation to oil, gas, petro-chemical & chemical industries on toxicity, fire & explosion and other general safety hazards. SGQC's training course or seminar are presented in English at an easily understandable level. The lecture presentations include extensive use of visual aids – slides or power point presentations and videotape films. More importantly, seminars allow reasonable time for discussion in an informal atmosphere encouraging floor participation.

Who would benefit from SGQC's Seminars?

In the past, Training seminars were offered to engineers as part of their Professional Development Program and also to essential technical and supervisory line management of Operations, Maintenance & Engineering organizations of one of the world's leading Oil & Gas Corporations. Seminars were recognized as educational and beneficial by the attendees. Seminars were considered excellent in developing and motivating engineers and other key technical and line management staff in training them as safety inspectors in the field of Fire & Safety.

Seminars are useful to safety & fire prevention engineers, relatively new process & maintenance engineers, other key technical professionals, line management supervisory staff from operations, maintenance and engineering organizations and to safety coordinators belonging to operations & maintenance organizations.

For familiarization, consider offering Fire & Safety seminars or courses to new and other Loss Prevention/safety engineers and also to new operating organizations engineers.

- As refreshers, consider offering Fire & Safety seminars or courses to key technical professionals and line management staff of operations, maintenance and engineering organizations.
- Consider offering Safety Orientation Program to all company employees including Loss Prevention and Operating Organizations at all levels.
- Consider offering basic and advance safety training to Safety Coordinators belonging to Operating Organizations.
- Consider offering Train-the-Trainers safety courses to selected company employees on chosen basic safety topics of interest.

STANDARD GLOBAL QUALITY CERTIFICATES

- Consider offering Safe Leaded Gasoline and/or Anti-knock Lead Compound Tank Cleaning, Dismantling & Disposal Seminars to key professionals and line management of proponent and contracting organizations.

SGQC Auditors and Trainers

GOPINATH BHASKER

General Manager of Standard Global Quality Certifications – Abu Dhabi
